SUMMARY

2nd-year AI/ML Engineering student at St. Joseph's College building production-grade LLM systems and computer vision solutions. Specialized in emotionally-aware AI agents, RAG pipelines, and multimodal systems. 56 public repositories with active contributions to neural networks, prompt engineering, and full-stack AI deployment. Open to internships and AI research collaborations.

EXPERIENCE

Stackrack Tech India Pvt Ltd

Dec. 2025 – Present

React & AI Developer Support Intern

Remote/On-site

- Supporting front-end development with **React** and Next.js; building responsive, performance-optimized components.
- Researching and implementing **prompt engineering** techniques for LLM integration into production applications.
- Debugging and optimizing AI model behavior; documenting best practices for reproducible AI workflows.

Inspire Softech

Jun. 2025 – Jul. 2025

Artificial Intelligence Intern

Remote/On-site

- Built interactive AI interfaces using **Gradio**; deployed HuggingFace models in Google Colab.
- Implemented conversational agents with model chaining and prompt optimization for real-time chat applications.

FLAGSHIP PROJECTS

Nova AI | TypeScript, LangChain, Next.js, LLMs

Aug. 2024 – Present

- Emotional intelligence layer for LLMs: context-aware systems detecting user mood, tracking emotional state, and responding with **genuine empathy**.
- Implemented session memory, adaptive tone shifting, and empathy scoring; deployed on production infrastructure.
- GitHub: 6+ stars; Featured as flagship project demonstrating LLM personalization beyond standard chatbot design.

Secure-Exam-Proctor | Python, YOLOv8, OpenCV, Computer Vision

Active

- Real-time anti-cheat exam proctoring using **YOLOv8** pose estimation and gaze vector tracking.
- Multi-person detection pipeline with alert triggering and session violation logging; zero false negatives in testing.

StudyBuddyPro | Python, Next.js, RAG, Pinecone

In Development

- Adaptive AI-powered learning suite: RAG-based quiz generator creating personalized questions from student notes.
- Flashcard engine with spaced repetition; progress analytics detecting knowledge gaps and adjusting difficulty in real-time.

Personal Portfolio & AI Ecosystem | Next.js, Python, FastAPI

Aug. 2024 – May 2025

- Multi-project portfolio: Pharma AI+ (medical data analysis), Movie AI scene generator, automation workflows.
- Full-stack deployment: FastAPI backends, PostgreSQL/MongoDB databases, Docker containerization, GitHub Actions CI/CD.

TECHNICAL SKILLS

LLM & Agents: LangChain, LlamaIndex, OpenAI API, Anthropic Claude, HuggingFace Transformers, Prompt Design
ML/DL Frameworks: PyTorch, TensorFlow, Keras, scikit-learn, YOLOv8, MediaPipe
Vector DBs & RAG: Pinecone, ChromaDB, FAISS, semantic search, retrieval pipelines
Languages: Python, TypeScript, JavaScript, SQL, HTML, CSS
Backend & APIs: FastAPI, Flask, Node.js, Next.js, REST architecture
Databases: PostgreSQL, MongoDB, Supabase, MySQL, Firebase
DevOps & Deployment: Docker, GitHub Actions, Vercel, Render, AWS, Google Cloud, CI/CD pipelines

EDUCATION

St. Joseph’s College of Engineering
B.Tech in Artificial Intelligence and Machine Learning Engineering
– CGPA: 7.51/10. Coursework: Neural Networks, Deep Learning, NLP, Computer Vision, MLOps.

2024 – 2028
Chennai, India

CERTIFICATIONS & ACHIEVEMENTS

- **Google Cloud Vertex AI Prompt Design** – Skill Badge (earned certification in generative AI design).
- **Community Leader** – CodeHack Pirates; organizing technical workshops and hackathons.
- **Google Developer Community** – GDG organizer; driving AI adoption in collegiate ecosystem.
- **Open Source Contributions** – 56 public repositories, active GitHub contributor with focus on AI/ML tooling.
